History of the CAMPERDOWN P & A SOCIETY and the development of the Camperdown Showgrounds

1904

Welcome to the 150th Camperdown Show

On the 17th November 1869, an energetic group of locals got together and staged a small show of farm produce in a local hall. At the conclusion of the event a meeting was held, and the Hampden & Heytesbury Pastoral & Agricultural Society was formed. President was Peter McArthur of Meningoort.

1880s

The next year on the 25th March a "Grain Show" was held in the Temperance Hall

On Friday October 28th 1870 the first Stock Show was held with horses, cattle, sheep, pigs, diary produce and saddlery. It

was held in the "Pound yard", 5 acres of land facing Gellie Street, temporarily reserved by the Government for the use by the Society. There were yards and fences constructed but the site was very wet some years for the show in October.

The Society sought new grounds when the Railway was to arrive and the tracks would go through the site. Initial negotiations in 1879 to purchase 16 ½ acres at the foot of Mt Leura from Finlay Brothers of Glenormiston for 12 pounds was declined. Then in 1881 a price of 20 pound per acre

1890s

was settled upon. A further 3 ¼ acres was purchased in June 1887 from Marion Manifold for 65 pounds.

The first Show on present site was held on 22nd October 1881. The area was described as “a shambles of boulders, fallen trees and ferns” but over the years the site was cleared and developed by building a large produce hall (1883), cattle yards, luncheon room and bar(1887 now stables) horse stalls(1905), sheep and pig pens(1901). On the west side of the grounds a rabbit proof stone wall was erected by Daniel Lawson of Terang for 2pound 2/6 per chain. This still stands today.

In 1924, the society changed its name to Camperdown Pastoral & Agricultural Society to reflect the local community.

After WWI there was a military flavour to the shows with mounted military drills and events for returned soldiers who had moved into the area with the soldier settlement scheme. The only years that the show wasn't held was during WWII (1941, 1942, and 1943)

The period after the Second WW, was a boom time for agriculture, there was a great deal of development at the show grounds and farms started to become more specialized. There was a move to have all shown animals registered with breed associations and disease control became important.

This brings us to 2022. Not since the 1940s had a show been cancelled. In 2020 and 2021 the Society had to cancel its show due to a global pandemic. So in 2022, we finally get to celebrate the 150th Stock show here at the beautiful Camperdown Showgrounds.

Agriculture has changed substantially, farmers now work in an environment that centres on technology and science. Biosecurity, animal welfare and sustainability are the buzz words at the moment, but farmers and the local community still need occasions to come together.

The Camperdown P & A Society would like to thank everyone for their support and hope you and your family have an enjoyable day and make some great memories.

NATIONAL SHEEP HEALTH STATEMENT

Explanatory Notes

- NOTE 1: **Biosecurity Plan:** Agreed actions and activities of farms and/or producers to prevent the incursion of animal disease(s) into a flock or onto a property. It may outline measures including (but not limited to) conditions on sheep movements into the area, vaccine policy and response to disease detection. These plans can be at a property or regional level and can cover a range of diseases. The National Farm Biosecurity Reference Manual for Grazing Livestock Production and regional biosecurity plan guidelines can be used to develop plans.
- NOTE 2: **Footrot:** Virulent footrot is defined differently in each state. For information on interstate movements of sheep, producers should visit the relevant state department website or contact animal health staff from that department.
- NOTE 3: **SheepMAP:** An audited quality assurance program incorporating a property biosecurity plan, animal health risk assessment, testing, and movement controls that provide a source of low risk animals. (Note: level of testing varies depending on status.)
- NOTE 4: **Faecal 350:** A test of 350 representative sheep over 2 years of age (or all sheep over 2 years of age in smaller flocks) by Pooled Faecal Culture (PFC) or equivalent test in pools of up to 50 sheep. The sheep must have been on the property for at least 2 years.
Abattoir 500: At least 500 sheep, over 2 years of age, have been submitted to an abattoir in the past 24 months, in 1 or more lots, have been examined and all found negative for OJD. The sheep must have been on the property for at least 2 years.
Abattoir 150: At least 150 sheep, over 2 years of age, have been submitted to an abattoir in the past 12 months, in 1 or more lots, have been examined and all found negative for OJD. The sheep must have been on the property for at least 2 years.
- NOTE 5: **Other:** Post mortem examination by a SheepMAP vet with no indication of OJD, or other negative test.
- NOTE 6: **Infected Flocks:** A flock which is infected with OJD, and there is evidence of or likely potential for transmission of infection within the flock, and the flock has not met the requirements for resolution of infection in accordance with the current National OJD Standard Definitions, Rules and Guidelines (SDR&Gs).
Suspected of being infected: A flock is suspected of being infected with OJD if the owner has reasonable grounds to believe that the flock has been exposed to OJD infection or that OJD may exist in the flock, based on:
– trace back or trace forward contact with an infected flock
– contact with OJD contaminated land or facilities
– a positive Johne’s disease screening test, e.g. abattoir monitoring or blood (ELISA) test
– is a neighbour of an infected flock unless there is an effective biosecurity barrier
– clinical signs of OJD, or
– advice from the relevant state agricultural department.
AND the flock has not met the requirements for resolution of suspicion in accordance with the SDR&Gs.
- NOTE 7: **NLIS ‘T’ tag (terminal) lamb:** A lamb which is to be slaughtered before it cuts its first permanent teeth and is identified by an NLIS (sheep) ‘T’ tag. The ‘T’ tag may be a requirement for trading into some areas.
- NOTE 8: **Approved Vaccinate:** A sheep that is identified by an NLIS (sheep) ‘V’ tag and is:
– vaccinated with an approved OJD vaccine by 16 weeks of age, or
– vaccinated with an approved OJD vaccine after 16 weeks of age, when the flock:
• was in the SheepMAP, or
• had undertaken a negative Faecal 350 test in the two (2) years preceding the vaccination, or
• had a Negative Abattoir 500 status at the time of vaccination.
- NOTE 9: **Other:** This could include sheep sourced from historical Low Prevalence Areas (LPA), or sheep that previously had an ABC score higher than 4, or were from an area with a regional biosecurity plan.
- NOTE 10: **Additional information:** A producer may wish to add additional information pertaining to the consignment and/or consignment flock that is not covered by answering the listed questions. Examples may include historical tests or prevalence areas for OJD, history of OJD vaccination if not continuous, worm resistance test results, where introduced sheep were sourced from, blood lines, micron, breed society, etc.
- NOTE 11: **Declaration:** Signing this declaration has legal significance. Regulatory authorities may take legal action, and purchasers may seek damages for any information that is incorrect. Before signing you must be satisfied you understand all elements of the document, and these explanatory notes.

For more information on biosecurity or diseases go to www.farmbiosecurity.com.au
